MASON SABIN

Kent, WA | (253) 255-4961 | Masonsabin@gmail.com | https://www.linkedin.com/in/mason-sabin/

SKILLS

Languages: Java | JavaScript | SQL
Web: React | Next.js | Leaflet | CesiumJS | CSS | Power Apps
Backend & Data: REST APIs | Power Automate | Dataverse | Node.js

WORK EXPERIENCE

Affirma - Power Platform Intern, Custom Development
Aug 2026 - Present

- Built 10 event-driven Power Automate flows for Seattle Public Utilities (SPU) regular hiring process, connecting 9 Dataverse tables. Now I'm building the canvas app for their temporary hire process
- Perform end-to-end testing on Power Apps Canvas apps to prioritize usability before client demonstrations
- Created and maintained documentation for all Power Automate flows, as well as contributed to documentation for the Canvas Apps

Green River College - Full-Stack Web Development Intern
Feb 2026 - Present

- Project manager for the migration of 3 legacy PHP apps to Node.js on a team of 9. I wrote the documentation, schema, and architecture plan, and track the work through GitHub Issues
- Designed, wrote, and tested 4 new Node.js REST APIs to replace legacy PHP endpoints
- Researched more cost-effective cloud services for hosting several internal applications, and proposed a plan to migrate to Google Cloud Platforms

Handshake AI - AI Training Fellow
Dec 2025 - Oct 2026

- Trained and evaluated large language models across computer vision, complex image, speech analysis, and Java coding projects
- Was accepted to and contributed to 6 projects over my 10-month fellowship. Gave critical feedback to improve model accuracy, reliability, and reasoning
- Audited hundreds of dataset entries weekly against detailed quality guidelines, under confidentiality agreements

PROJECT EXPERIENCE

CodeDay Micro-Internship - Open Energy Dashboard Contributor
May 2026 - Jun 2026

- Wrote and implemented an integration test in Node.js/Mocha, to check energy→carbon readings (kWh→ metric ton CO2).
- I seeded test data, units, and conversion chains in PostgreSQL and verified API correctness against expected CSV readings for 15-minute intervals
- Was the Scrum Master for our team of 3, and I made sure we met specific deadlines required by our internship program

EDUCATION

Bachelor of Applied Science in Information Technology Software Development
Green River College | *Expected Graduation: June 2027*

Associate of Applied Science in Data Analytics & Software Development
Green River College | *Graduated: December 2025 - Cum Laude*

Certifications & AI**:** Google Prompting Essentials Specialization | Claude 101 by Anthropic | AI Fluency: Framework & Foundations by Anthropic | Prepare Data for Exploration by Google | Process Data from Dirty to Clean by Google
