

MASON SABIN

Kent, WA | (253) 255-4961 | Masonsabin@gmail.com | [GitHub](#) | [LinkedIn](#)

PROFESSIONAL SUMMARY

As a rising senior at Green River College I work with local businesses to build personalized software and web-applications tailored to their needs. With an Associate of Applied Science in Data Analytics and Software Development, I understand that data and AI work cohesively together, I know clean optimized data is the key to building the best software systems.

SKILLS

Languages: Java | Python | JavaScript | TypeScript | SQL | C++

Web: React | HTML | Next.js | Tailwind | Leaflet | CesiumJS | CSS

Backend & Data: Node.js REST APIs, PostgreSQL | MySQL | NumPy

Certifications & AI: Google Prompting Essentials Specialization | Claude 101 by Anthropic | AIFluency: Framework & Foundations by Anthropic | Prepare Data for Exploration by Google | Process Data from Dirty to Clean by Google

WORK EXPERIENCE

Green River College - Full-Stack Web Development Intern

Feb 2026 - Present

Auburn, WA

- Designed, coded and tested, new [Node.js](#) REST APIs to replace legacy PHP endpoints, using Git in an Agile team workflow.
- Refactored and migrated legacy PHP application modules into [Node.js](#) with relational databases.
- Collaborate often with faculty and staff to implement requested features using an interactive backlog and sprint-style planning.

Handshake AI - LLM / AI Trainer

Dec 2025 - Present

Remote (Kent, WA)

- Train and evaluate large language models by auditing hundreds of dataset entries weekly, ensuring high-quality training for enterprise clients under NDA.
- Follow detailed evaluation guidelines and provide critical feedback to improve model behavior, reliability, and intelligence.

Personal Projects

GeoSight | React | Typescript | Cesium | Tailwind | Redis | Vercel | MapLibre GL

Mar 2026 - Present

<https://geosight.earth>

Kent, WA

- Building a GIS platform that currently aggregates 80+ government and open-data APIs into real-time mission level briefings and reports across 9 mission lenses.
- Architected the full stack AI-powered application and integrated dual LLM pipeline for instant geospatial analysis with a specific scope in mind.
- Received the award of being added to the LearnHub on Handshake after the codex creator challenge.

Open Source & Volunteer Work

CodeDay Micro-Internship - Open Energy Dashboard Contributor

May 2026 - Jun 2026

Remote (Kent, WA)

- Wrote and implemented the LR19 integration test in [Node.js/Mocha](#) which validated a chained conversion (kWh → metric ton CO2) for OED range queries
- I seeded test data, units, and conversion chains in PostgreSQL and verified API correctness against expected CSV readings for 15-minute intervals.

Professional Disc Golf Association - Tournament Director Marketplace Web-App

Sep 2025 - Dec 2025

Remote (Kent, WA)

- Worked in an agile team as the SCRUM Master in a group of 4 to build out a mock website for the PDGA.
- Handled email authentication and verification process, to allow tournament directors to sign in to a platform and order supplies for the events which they host.

EDUCATION

Bachelor of Applied Science in Information Technology Software Development

Green River College | *Expected Graduation: June 2027*

Associate of Applied Science in Data Analytics & Software Development

Green River College | *Graduated: December 2025 - Cum Laude*
